## EXPERIENCE

Fev, 24 - Today  
Dev Jr

### Full-Stack Developer

Digital Metropolis Institute

I am currently developing an application for the multinational company Acer, the Acer Seller Center. My role involves developing a Single Page Application using AngularTS, microservices, and Rest APIs using Java and Spring Boot integrated with a PostgreSQL database, applying best programming practices, design patterns, and software testing.

**Stacks | Java | Spring | NodeJS | PostgreSQL | HTML | CSS | JavaScript | Angular | TypeScript | Tests**

Nov, 22 - Feb, 24  
Internship

### Full-Stack Web Developer

Federal Justice of Rio Grande do Norte

My first significant opportunity to act as a developer within a team. Here, I gained my initial real-world experience in developing for the professional market. I engaged with Web Development technologies, practical Git Versioning, API development, front-end layout design, front-end and back-end integration, and database management.

I worked on developing applications for the legal system using Spring Boot for microservices architecture and integrating with relational databases like PostgreSQL. I also utilized Angular TypeScript on the front-end to develop single-page applications using UI/UX practices for responsive designs suitable for all types of devices.

During this period, I learned to work with Agile methodologies like Sprint and Scrum, continuously developing and enhancing my soft skills during daily and delivery meetings with stakeholders.

**Stacks | Java | Spring | NodeJS | PostgreSQL | HTML | CSS | JavaScript | Angular | TypeScript | UI/UX**

## GRADUATION

Jun, 21 - Today  
Bachelors

### Bachelor of Technology in Information Technology

Federal University of RN

This initial degree has been a profound journey of learning. It is here that I have comprehensively understood the world of programming, starting from low-level languages such as C to high-level languages like Python and Java. Additionally, I have had the opportunity to work on projects related to IoT. A pivotal aspect of my learning, especially after declaring my emphasis on Software Engineering aiming for a dual degree, includes design patterns, software architectures, modeling strategies, and other elements of software development.

## ABOUT ME

I am currently a student in the Bachelor's program in Information Technology at UFRN. My primary interest lies in Web Development, although I am also keen on Data Science using Python. I have had a lifelong passion for game development.

## GOALS

To work as a full-stack, back-end, or front-end developer. Moreover, my goal is always to learn as much as possible wherever I go, in both software and technology development as well as in enhancing my soft skills, ultimately establishing myself as a respected developer in the industry.
